

Kanishka Shukla

AI Engineer · LLM Systems · Full-Stack · Backend

kanishkashukla04@gmail.com · Kanpur, India · Remote-Ready · github.com/KanishkaShukla04 · linkedin.com/in/kanishkashukla04

SUMMARY

Third-year B.Tech CSE (AI/ML) student at VIT Bhopal with production experience building LLM-powered applications, Agentic RAG pipelines, document intelligence systems, and full-stack web products. Built DocuMind AI — an end-to-end Document Intelligence + RAG system with OCR, LLM classification, vector search, grounded citations, and multi-layer security. 500+ GitHub commits · 100+ DSA problems · Available immediately · Remote-ready.

CORE SKILLS

LLM & Gen AI	LangChain · LlamaIndex · OpenAI API · Google Gemini API · Ollama · Llama 3.2 · Prompt Engineering · RAG Pipelines · Agentic Workflows · Structured JSON Output
ML / NLP	Scikit-learn · Pandas · NumPy · Feature Engineering · Embedding Models · ChromaDB · FAISS · Vector Search · NLP · Model Evaluation (F1/Precision/Recall)
Backend	Python · FastAPI · Node.js · Express.js · Java · Spring Boot · REST API Design · JWT Auth · OAuth 2.0 · RBAC
Frontend	Next.js 14/15 (App Router) · React 18 · TypeScript · Tailwind CSS · Vite
Data & DevOps	MongoDB Atlas · PostgreSQL · MySQL · Docker · Docker Compose · GitHub Actions · CI/CD · Vercel · Render · Railway · AWS Fundamentals
Languages	Python · TypeScript · JavaScript (ES2022+) · Java · C++ · SQL · HTML/CSS

PROJECTS

DocuMind AI — Document Intelligence + Agentic RAG

Python · FastAPI · LangChain · Google Gemini API · ChromaDB · pdfplumber · pdf2image · pytesseract · Next.js · TypeScript · Tailwind CSS
github.com/KanishkaShukla04/DocuMind-AI · Live: docu-mind-jlwvd44ej-kanishkashukla04s-projects.vercel.app

- Built an end-to-end AI Engineer Internship Assessment project — ingests scanned PDFs, handwritten pages, image-heavy reports, and tables using pdfplumber, pdf2image (Poppler), and pytesseract (OCR); stores extracted text + rendered page image per page.
- LLM-based multi-dimension document classifier (Gemini API): outputs structured JSON with type, topic, sensitivity level, content characteristics, and summary — schema self-designed.
- Agentic RAG pipeline (LangChain + ChromaDB): retrieves relevant chunks, synthesises grounded answers with inline citations (document name + page number + page thumbnail); refuses to hallucinate when no relevant content exists.
- REST API: POST /upload (bulk parse → classify → embed → index, with per-file status) and POST /chat (multi-turn Q&A; with citation metadata). Next.js frontend with bulk upload page, citation thumbnail previews, and click-to-expand full page view.
- Security: env-variable secrets, file isolation, no client-side API keys, separate upload/chat routes, input validation at every layer. Security Decisions section documented in README.

Trinethra — LLM Supervisor Feedback Analyzer

Next.js 15 · TypeScript · Ollama · Llama 3.2 · Prompt Engineering · Next.js API Routes
github.com/KanishkaShukla04/Trinethra

- End-to-end LLM pipeline: routes supervisor call transcripts through locally hosted Llama 3.2 (via Ollama) and returns structured JSON — sentiment evidence, rubric scores (1–10 with justification), KPI mapping, gap detection, and follow-up questions in a single inference pass.
- Solved structured output reliability: JSON enforcement, extraction & validation layers, and parsing fallback handling for consistent API responses. Responsible AI design: all outputs labelled as AI-generated suggestions pending human review.

GigFlow CRM — Production Full-Stack Platform

React 18 · Node.js · Express · MongoDB Atlas · Docker Compose · JWT · RBAC · TypeScript · CI/CD
github.com/KanishkaShukla04/gigflow-crm · Live: gigflow-crm.vercel.app

- Sole developer — production CRM with JWT stateless auth, RBAC (Admin/Sales Rep), CRUD lead management, analytics dashboards, debounced search, pagination, and CSV export.
- RESTful API using controller-service-repository pattern; MongoDB Atlas aggregation pipelines and compound indexes. Dockerized with Docker Compose; full CI/CD pipeline via GitHub Actions.

Food AI Safety System — Agentic ML Pipeline

Python · Java · Spring Boot · Scikit-learn · REST API · Maven

github.com/KanishkaShukla04/food-ai-safety-system

- Agentic pipeline: natural language food queries → multi-stage ML classification (Python/Scikit-learn) → structured JSON safety risk assessments via versioned Java/Spring Boot REST API with Spring IoC dependency injection.

AccentTrainer — NLP Language Learning App

Next.js 14 · TypeScript · Scikit-learn · Embedding Models · Web Speech API

github.com/KanishkaShukla04/AccentTrainer · Live: accent-trainer-pi.vercel.app

- Semantic search layer using Scikit-learn and embedding models for phonetic/semantic word discovery — zero LLM dependency, offline-capable. In-browser accent playback via Web Speech Synthesis API.

WORK EXPERIENCE

Machine Learning Intern

CodeAlpha · Remote · May 2025 – Jun 2025

- Designed and trained supervised ML models (classification & regression) with feature engineering, cross-validation, and hyperparameter tuning — optimised for F1, precision, and recall.
- Delivered end-to-end ML artifacts (ingestion → preprocessing → training → evaluation → documentation) within agile sprints; participated in code reviews with senior engineers.
- Communicated model performance to technical and non-technical stakeholders in an async, remote-first environment.

Visual Designer

InAmigos Foundation · Remote · Dec 2025 – Jan 2026

- Translated AI-generated data insights into visual narratives for social impact reporting; managed independent deliverables under flexible deadlines.

EDUCATION

B.Tech — CSE (AI & ML) · VIT Bhopal

2024 – 2028 (Expected) · CGPA: 8.08

CERTIFICATIONS

- ✓ Machine Learning with Python — IBM / Coursera · 2025
- ✓ Python Essentials for Data Science — Vityarthi · Apr 2025
- ✓ AWS Solutions Architecture Job Simulation — Forage / Amazon · May 2025
- ✓ ServiceNow Certified (AI Development) — SmartBridge · Jun 2025
- ✓ Fundamentals in AI & Machine Learning — Vityarthi · Sep 2024
- ✓ NPTEL Cloud Computing — NPTEL

COMPETITIVE PROGRAMMING

100+ DSA problems solved across LeetCode, Codeforces, and GeeksforGeeks — Arrays, Strings, Trees, Graphs, Dynamic Programming, Recursion. · 500+ GitHub commits.

Available immediately · Remote-ready · Open to AI Engineer, LLM Engineer & Full-Stack AI roles
